WiFi solutions for
bus operators

Simple, secure, fair, flexible Mobile Hotspot Solutions

Professional WiFi solutions for vehicles

More and more bus operators throughout Europe are offering their passengers free hotspots from HOTSPLOTS on buses and trains. The operators of the vehicles benefit from the comprehensive services. These include hardware specially developed and certified for use in vehicles (e.g. routers and outdoor antennas for cellular reception) and combine reliable internet connection with various entertainment solutions.

Example of a supported router with E-mark-certification for road traffic

Flexibility and security

HOTSPLOTS' WiFi solutions provide passengers with fast and flexible access to the internet. The operator decides how the framework conditions for access should be designed: free of charge and unlimited or with volume or time limits.

HOTSPLOTS offers flexible solutions for all aspects of access control and extensive evaluation of internet use.

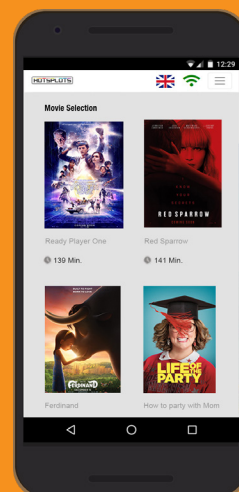

HOTSPLOTS Entertainment

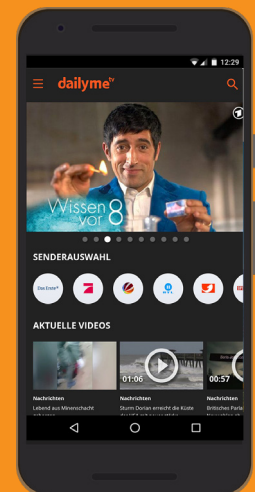

Today, it is important for passengers to have a WiFi connection on board. Especially on routes with limited mobile phone reception, an additional on-board entertainment offer makes it possible to increase passenger satisfaction. HOTSPLOTS Entertainment offers a flexible

supplement to the WLAN offer at mobile hotspots in long-distance travel.

Hollywood blockbusters, series or daily updated TV entertainment, documentaries and news - with HOTSPLOTS Entertainment an attractive portfolio is always available, even for multi-day trips. For the passengers this way even with longer journeys time flies by.

HOTSPLOTS Cinema

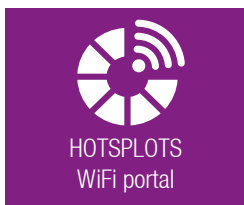

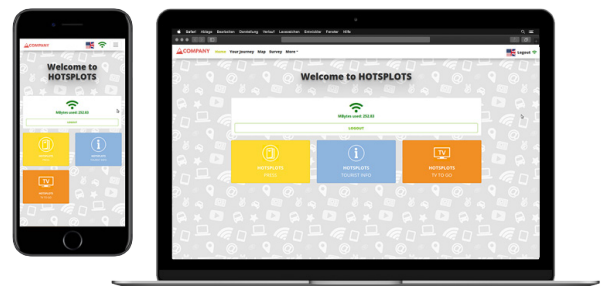

HOTSPLOTS TV to go

Good entertainment HOTSPLOTS WiFi Portal

Films, television, magazines – innovative & attractive entertainment in the WiFi portal

A WiFi portal supplements the hotspot with access to the internet and with a communication channel to the passengers. Within the portal, real-time passenger information, entertainment solutions, in-house data and advertising can be integrated.

The modular entertainment solutions from HOTSPLOTS offer excellent entertainment opportunities. The selected media are made available locally on the system and are therefore also available offline in the WiFi portal. Updates for daily updated offers are automated via the HOTSPLOTS Content Delivery Network. If necessary, updates are imported via “WiFi service stations” in the vehicle depots or at selected stopping points, and thus hardly affect the data volume.

Various information and entertainment modules are available for the WiFi portal:

HOTSPLOTS Entertainment - Films, Series, News & Documentations

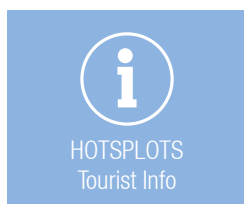

The video service is provided to passengers easily on the local WiFi portal. Choose the right offers for your passengers from the HOTSPLOTS entertainment package:

- With **HOTSPLOTS Cinema** HOTSPLOTS delivers Hollywood blockbusters and series directly via the WiFi portal of your buses to the passengers’ end devices.
- Popular TV shows, movies, series, shows and documentaries can be made available in WiFi using **HOTSPLOTS TV to go**.

HOTSPLOTS Press - Digital newspapers and magazines

With HOTSPLOTS Press, your passengers have access to the latest digital newspapers and magazines. The digital media are downloaded directly to passengers’ smartphones, tablets or notebooks with no additional app and are still available offline after the journey has ended.

HOTSPLOTS Tourist Info - Your digital tourist guide

With HOTSPLOTS Tourist Info, you can offer a high-quality tourist information portal related to their journey to your passengers. Regional services such as events, excursion tips for the immediate area, restaurant and hotel recommendations and weather information are provided directly over your hotspot.

The portal data is offered to passengers automatically and on the browsers of their own devices after connection to the WiFi. The WiFi thus becomes an individual entertainment or information channel for the provider.

At a glance

Both in the long-distance travel market and in local public transport, the demand of passengers for a flexible Internet service is large.

From initial fitting of the equipment through to retrofitting of vehicles, HOTSPLOTS supplies a multitude of solutions that can be combined flexibly. HOTSPLOTS offers this **flexibility** and an **all-round service** that ranges from the **data tariff** to your **preferred entertainment package** for your entire vehicle fleet.

Discover Europe!

Whether you are in your home country or abroad, mobility means thinking without limits, on the road and on the Internet. HOTSPLOTS therefore ensures that you are legally protected and meet all country-specific requirements throughout the EU for your mobile hotspot.

Advantages of HOTSPLOTS solutions in vehicles

- **VPN routing** – Optimal design of the vehicle-to-land connection (e.g. bandwidth management, load balancing, minimal overhead).
- **Legal security** – With HOTSPLOTS, you can ensure that you meet all legal requirements, EU-wide!
- **Flexible and scalable** – Our WiFi systems can be fitted in almost any vehicle and can be extended as required.
- **All-round service for you** – On request, we can provide a complete package that includes a data tariff and entertainment solutions.
- **Seamless connectivity** – 100% passenger comfort: automatic connection between stop, bus and train.
- **Everything in view** – Thanks to the HOTSPLOTS customer area and HOTSPLOTS Telemetry, you can have simple fleet monitoring at your fingertips.
- **WiFi portal** – Passenger information in real time and attractive entertainment offers directly to your passengers' devices.

Sounds interesting?

We look forward to hearing from you and would be happy to advise you.
