Professional WiFi solutions for vehicles

Nowadays, WiFi on buses is often part of the standard equipment. Both in the long-distance travel market and in local public transport, the demand of passengers for a flexible Internet service is correspondingly large.

From initial fitting of the equipment through our partner Robert Bosch Car Multimedia GmbH through to retrofitting of vehicles, HOTSPLOTS supplies a multitude of solutions that can be combined flexibly. HOTSPLOTS offers this **flexibility** and an **all-round service** that ranges from the **data tariff** to your **preferred entertainment package** for your entire vehicle fleet.

With HOTSPLOTS WiFi solutions, you can offer rapid and flexible Internet access to your passengers.
