Secure & Flexible

# Public WiFi

## Offer a hotspot with ease

Visitors and guests are often actively looking for the opportunity to save on their data download volumes by using public WiFi points. Hotspots in city centres, shopping centres, residential facilities, libraries, clinics, hotels and restaurants – not to mention public transport – are now increasingly available and easy to use.

With the support of HOTSPLOTS WiFi services, more than 15,000 institutions, municipalities and companies are already able to offer a public hotspot location. They profit not only from the positive user response, but also from the active communication channel with their visitors as well as additional options concerning tourist offers or entertainment solutions.

## Fully flexible variety

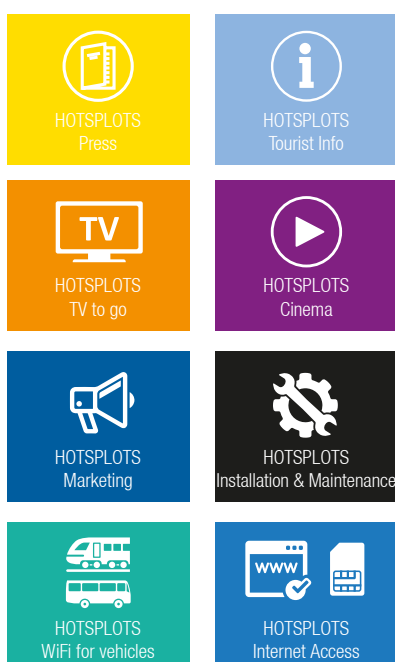

HOTSPLOTS solutions are characterised by a catalogue of services that provides the right solution for each and every requirement.

Among other things, it is customary for a hotspot to have:

- The **individual setting options** on the login page and the landing page. This is where not only the logo of the location is displayed, but also current information, offers or additional services can be shown to the users.
- The set-up of a “**Walled Garden**”.
- Internet use authorisation at the hotspot via individually adjustable **usage times**.
- If necessary, HOTSPLOTS will be on site with its own technicians or regional partner companies to ensure **smooth activation**.
- The **support service** is free of charge. End users of HOTSPLOTS WiFi solutions can also call our **technical hotline**.

HOTSPLOTS will also **set up an Internet connection** if required.

HOTSPLOTS WiFi services are complemented by a variety of entertainment offers (HOTSPLOTS Media) and solutions for mobile hotspots (HOTSPLOTS WiFi for vehicles).

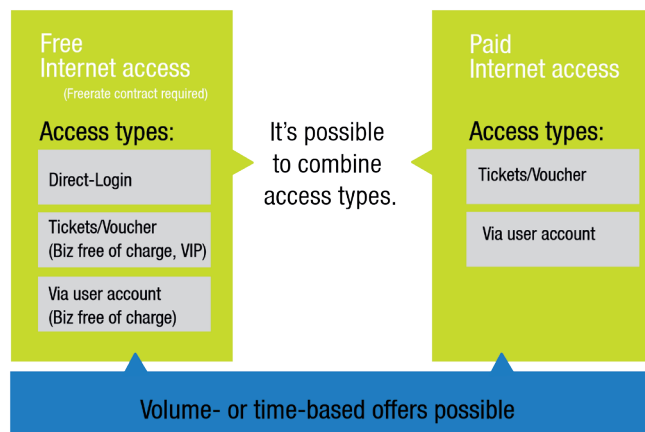

## Tailor-made

### The perfect solution

Using HOTSPLOTS WiFi solutions, you can offer rapid and flexible Internet access to your guests, visitors or colleagues. You decide how you want to enable access:

- **Direct-Login** – Free of charge, through simple acceptance of the conditions of use,
- **User-Login** – By registering and having a user account on hotspots.de, or
- **Ticket-Login** – Based on tickets (vouchers).

User access can be restricted in time or by a maximum data volume, as you prefer. HOTSPLOTS offers flexible solutions for all aspects of access control and extensive evaluation of hotspot use.

### Legal requirements & data protection

HOTSPLOTS complies with the respective country-specific requirements for WiFi providers. These affect amongst other things telecommunications requirements and data protection issues (GDPR).

We will make all necessary adjustments to the legal requirements for the operation of a public WiFi hotspot.

This ensures that your WiFi hotspot always meets the latest legal requirements.

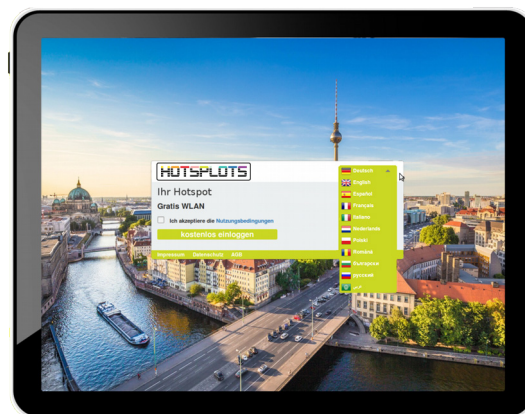

## Suitable hardware and carefully thought-through software

A perfect solution is comprised of many individual parts. HOTSPLOTS combines the hardware that's suitable for a particular location (e.g. indoor / outdoor, stationary / mobile, low visitor traffic / high user density) with a sophisticated software that is constantly adapted to new requirements and developments. If a professional WiFi infrastructure already exists, you can simply add a HOTSPLOTS Appliance or a hotspot router before accessing the Internet.

HOTSPLOTS supports WiFi **roaming groups** across multiple locations, enables users' end devices to **auto login**, and uses intelligent **bandwidth management** to ensure that the available Internet bandwidth is distributed fairly among all of the hotspot's users.

HOTSPLOTS is always on hand to provide its customers with technical know-how and comprehensive services. These range from **billing models**, **filter solutions** (e.g. youth protection) and **VPN routing** through to **central 24/7 hotspot monitoring**.

The HOTSPLOTS login page is available in several languages.

## Advantages of HOTSPLOTS WiFi

- **A variety of conditions** under which your hotspot can be used – you decide.
- **Security through VPN routing** – Protects against the legal consequences of misuse of data.
- **Legal security** – HOTSPLOTS meets all of the legal requirements centrally.
- **Flexible and scalable** – Our WiFi systems adapt to your needs.
- **All-round service for you** – On request, we can provide a customised complete package including data tariff.
- **Easy and fast** – Convenient administration of your hotspot and fully automated billing.
- **Regional partner network** – One of our over 300 service and installation partners is in your area.
- **Mobile solutions** – Intelligent passenger services with HOTSPLOTS vehicle WiFi.

### Sounds interesting?

We look forward to hearing from you and would be happy to advise you.
